## JASPE ACID

### Rinse Aid

#### DESCRIPTION

Liquid for giving shine to crockery whilst drying in the machine. Special for hard water. It accelerates drying and prevents limescale on dishes.

#### FORM OF USE

Dose between 1 to 10 g/litre in the rising cycle, depending on its temperature and the hardness of the water. In zones where the hardness is extreme, we recommend to decrease the rising temperature.

NOTE: If the temperature is top to 35°C, the product can be muddied ut this neither concerns the properties of the product, nor as a sign of that the product is defective.
